Screen Goo China To Serve Chinese Video Projection Screen Markets

*Highest Quality Video Projection Screens Done in a New and Innovative Way –
Paint them on yourself!*

Kingston, Ontario, Canada - Beijing, People's Republic of China - June 08, 2007 – Goo Systems, the manufacturer and developer of Screen Goo products and Screen Goo Asia are pleased to announce the formation of an operation dedicated to serving the needs of the high quality Video Projection Screen markets in the People's Republic of China.

Screen Goo is a specially formatted, highly reflective acrylic paint, designed specifically for the Video Projection industry. Screen Goo acrylic paint allows one to transform any smooth paintable surface into a high performance projection screen.

Screen Goo's performance reflects many years of research and development and has the capacity to outperform most of the existing screen products in use today. Screen Goo is made from the highest grade acrylic available and contains no filler materials. Whether used in a professional or home situation its simple application, versatility, quality and variable gain characteristics are remarkable.

Screen Goo China is now looking for Distributors, Dealers and Contractors to market, sell and support the Screen Goo products in their local markets in all parts of the People's Republic of China. Several local visits, trade shows and hands-on seminars will take place in Beijing, Shanghai and Shenzhen to promote the Screen Goo products this year.

“We are very pleased to be setting up local Customer Satisfaction centers in Asia and particularly in China where there is a growing demand for our products. In Screen Goo China we were able to find people not only expert in our industry but also people with a deep conviction for customer care and service” said Kevin Nute, VP Sales & Marketing for Goo Systems.

“We are excited about the Screen Goo product and its capabilities in helping produce projection screens of the highest possible quality. The vast and expanding Chinese markets hold great potential for such a product. The potential of applications using this product is only limited by one's imagination.” added Jimmy Wu, President of Screen Goo China.
